GOOD TO KNOW

- **How long does it take?** Depending on the procedure, the entire process from consultation to the finishing treatment takes between one and three hours.
- **Will it sting?** Your individual pain threshold and sensitivity determine how much unpleasantness you'll feel. A local anesthetic can soften the sensation.
- **Exactly how permanent is it?** Your permanent makeup will last 3-5 years (average) depending on the structure of your skin, your age and lifestyle.
- **Is it safe?** Yes – amiea-certified permanent makeup practitioners adhere to the strictest hygiene and safety standards.

PERMANENT MAKE UP: BEFORE AND AFTER

The individual effect is a result of your choice of procedure and intensity, your color type, age, and skin structure. No matter which permanent makeup procedure you choose, the look should suit your type and enhance your features in a balanced, natural way. Here are a few examples:

LOOK GREAT 24/7

Permanent makeup stays with you every day, 24/7. It doesn't wash off, smudge, or get runny – ever. Just look your very best – from the moment you wake up in the morning, all through a busy day, during workout sessions, and even as you lay down at night.

- At the beach, in the pool, under the shower, during your workout: your **makeup stays perfect**. No smudges, no smears.

- Even after the most passionate kisses, your lips will look as gorgeous as before (okay, much more gorgeous). No stains, **no reapplying**.

- Permanent makeup is **absolutely weatherproof** – you'll keep on looking perfect, even in pouring rain or scorching heat.

- Open your eyes and look just **perfect every morning** – even before you hit the bathroom.
